

Kendra Blankenship

Pensacola, FL • (850) 614-8567 • kendrablankenship2@gmail.com • www.linkedin.com/in/kendra-blankenship-70177038b • <https://k-blankenship.github.io/kendra-blankenship-portfolio->

Summary

Military veteran transitioning into IT with a strong foundation in logistics, operations management, accountability, and team leadership. Holds CompTIA A+ and Security+ certifications and is actively pursuing Network+ to deepen networking expertise. Brings hands-on technical experience through home labs, EVE-NG simulations, OSINT exercises, and endpoint configuration in real and virtualized environments. Applies a disciplined, methodical approach to troubleshooting, documentation, and security — refined across military service, healthcare logistics, and financial services.

Certificates

- CompTIA Network Plus – In progress
- CompTIA Security Plus – Certified 2026
- CompTIA (Core 1 & 2) – Certified 2026
- Cybersecurity – Certified 2025
- Network Security – Certified 2025
- Networking – Certified 2025
- Cloud Computing – Certified 2025
- Device Configuration & Management – Certified 2025

Badges & Micro Credentials

IBM SkillsBuild — Cybersecurity / IT Fundamentals Badge — Issued by IBM via the SkillsBuild platform.

Additional Qualification

Former **Secret Security Clearance** (Held approximately 10 years; currently inactive)

Experience

2023 – 2024

Medical Courier Services | MidEast Delivery Solutions | Pensacola, FL

- Completed 5–8 daily route stops transporting 10–60 totes of medical specimens and supplies under strict chain-of-custody protocols and healthcare regulatory standards.
- Handled controlled substances in full compliance with DEA and applicable healthcare regulations, maintaining zero chain-of-custody violations.
- Executed STAT runs requiring time-critical delivery coordination and real-time route adjustment under pressure, mirroring incident-response prioritization in IT environments.

- Maintained temperature-sensitive specimen integrity throughout transport through proper handling procedures and continuous condition monitoring.
- Ensured accurate manifest documentation and confirmed delivery on every route segment, sustaining an unbroken audit trail for all transported materials.

2023

Delivery Driver | OneBlood | Pensacola, FL

- Delivered time-sensitive blood products to hospital facilities across assigned routes, ensuring cold-chain integrity and on-time delivery compliance at every stop.
- Maintained strict chain-of-custody documentation for all blood product transfers; verified recipient sign-off at each hospital stop to sustain an unbroken audit trail.
- Operated under biohazard handling protocols and healthcare regulatory standards, consistently meeting safety and compliance requirements across all deliveries.

2022

Transportation Driver | ITL Solutions | Pensacola, FL

- Transported elderly and disabled clients to medical appointments and workplaces, maintaining strict on-time performance and professional conduct on every trip.
- Managed daily route logistics, coordinating multiple stops while ensuring passenger safety, comfort, and dignity throughout each assignment.
- Maintained vehicle compliance and documentation standards; communicated proactively with dispatch and clients to resolve scheduling changes and minimize service disruptions.

2021-2022

Members Services Representative | Navy Federal Credit Union | Pensacola, FL

- Assisted 60–100+ members per shift across account services, transactions, and financial product inquiries in a high-volume, regulated credit union environment.
- Maintained precision and compliance standards across all member interactions, consistently adhering to federal credit union regulations and internal policy requirements.
- Resolved escalated member concerns through calm, professional communication and timely follow-through, reducing repeat contacts and improving member satisfaction outcomes.
- Supported team operations during peak service periods; cross-trained across multiple service functions to maintain staffing flexibility and service continuity.
- Documented member interactions and service actions in full accordance with credit union data governance and recordkeeping policies.

- Demonstrated consistent reliability, attention to detail, and regulatory awareness across all transactions — foundational traits directly transferable to IT compliance and help desk roles.

2009-2017

92Y- Unit Supply Specialist | Sergeant/NCO | United States Army | Various locations including Afghanistan

- Supervised nine soldiers across supply and logistics operations, providing daily leadership, mentorship, and performance accountability in garrison and deployed environments.
- Managed and safeguarded over \$100M+ in U.S. Army equipment through rigorous inventory control, scheduled inspections, and formal property transfer processes.
- Supported logistics operations for four distinct units simultaneously, ensuring uninterrupted supply chain continuity across multiple command elements under demanding operational conditions.
- Deployed in direct support of operations in Afghanistan; maintained mission-critical supply accountability under austere conditions and sustained high performance under pressure.
- Conducted formal property accountability investigations (FLIPLs) — prepared documentation packages, gathered and organized evidence, and presented findings directly to command leadership.
- Processed sensitive shipments requiring special handling classifications, precise documentation, and strict chain-of-custody verification at every transfer point.
- Administered the unit Government Travel Card (GTC) program: managed individual accounts, enforced policy compliance, submitted required compliance reports, and maintained fiscal control for 300-500 personnel.
- Led comprehensive compliance inspections and risk assessments for high-value equipment; established corrective action plans for inventory discrepancies to guarantee perfect audit readiness.
- Trained and evaluated junior soldiers on supply procedures, equipment handling, and documentation standards — developing NCO-level instruction and evaluation skills directly applicable to IT training and mentorship roles.

Technical Projects

EVE-NG Network Simulation Labs

Built multi-device virtual topologies to practice routing protocols, VLAN segmentation, and network troubleshooting in an enterprise-style environment. Demonstrates practical networking design and hands-on configuration skills beyond certification study.

VLAN & Inter-VLAN Routing Practice

Configured inter-VLAN routing and subnetting scenarios; documented configurations and verified end-to-end connectivity using ping and traceroute. Reinforces structured documentation habits and network segmentation principles.

Wireshark Packet Analysis

Captured and analyzed live and simulated network traffic; identified protocol behavior, anomalies, and handshake sequences directly relevant to security monitoring and threat analysis workflows.

Linux (Lubuntu) System Configuration

Set up and configured Lubuntu environments; practiced file permissions, user account management, package installation, and terminal-based system administration. Builds command-line proficiency applicable to SOC and sysadmin roles.

Windows Imaging & Recovery

Performed system imaging, factory resets, and post-recovery configuration; documented each procedure for reproducibility and knowledge transfer. Directly mirrors enterprise endpoint management and help desk workflows.

OSINT Reconnaissance Exercises

Conducted open-source intelligence gathering using publicly available tools and techniques; practiced responsible scope management and thorough documentation throughout. Demonstrates security-minded thinking and awareness of attacker reconnaissance methods.

VirtualBox Virtualization Lab

Built isolated virtual machine environments for testing OS configurations, networking scenarios, and security practice without impacting host systems. Reflects disciplined lab hygiene and a safe-testing mindset essential in cybersecurity.

Echoed Chambers — Technical Workflow Project

Independent content production operation requiring multi-platform publishing workflow, file management, version control habits, audience targeting, and consistent output scheduling. Demonstrates operational discipline, technical process management, and the ability to independently sustain a structured production pipeline.

Technical Skills

Operating Systems: Windows 10/11, Linux (Lubuntu/Ubuntu, Kali), Command Line (CMD, Bash)

Security: CompTIA Security+ (Certified), OSINT Techniques, Log Review, Basic Threat Analysis

Tools: Wireshark, EVE-NG, VirtualBox, Linux Terminal, GitHub

Networking: TCP/IP, VLANs, Subnetting, Routing Protocols, Network+/A+ concepts

Hardware/Software: VirtualBox, Windows Imaging & Recovery, Device Configuration, Help Desk Workflows

Professional Skills: Team Leadership, Inventory Control, Compliance Reporting, Technical Documentation, Training & Mentorship

Education

GEORGE STONE – PENSACOLA, FL – CERTIFICATION IN NETWORK SUPPORT SERVICES, OCT 2026

GEORGE STONE – PENSACOLA, FL – CERTIFICATION COMPUTER SYSTEM INFO TECH, OCT 2025

PENSACOLA STATE COLLEGE – PENSACOLA, FL – ASSOCIATE IN ARTS, DEC 2021
