

Kendra Blankenship

Pensacola, FL • (850) 614-8567 • kendrablankenship2@gmail.com • www.linkedin.com/in/kendra-blankenship-70177038b • <https://k-blankenship.github.io/kendra-blankenship-portfolio->

Summary

Military veteran and emerging IT professional with CompTIA A+ and Security+ certifications, hands-on experience in networking labs, endpoint configuration, Linux, virtualization, Wireshark analysis, and security fundamentals. Brings 8 years of Army leadership experience managing high-value equipment, compliance documentation, audits, and team training. Known for disciplined troubleshooting, strong documentation habits, accountability, and calm performance in regulated, high-pressure environments.

Certifications and Credentials

- CompTIA Network Plus – In progress
- CompTIA Security Plus – Certified 2026
- CompTIA A+ – Certified 2026

Additional Coursework (2025)

Cybersecurity · Network Security · Cloud Computing · Device Configuration & Management

Badges & Micro Credentials

IBM SkillsBuild Cybersecurity / IT Fundamentals Badge — Issued by IBM via SkillsBuild platform.

IBM SkillsBuild Cybersecurity / Ethical Considerations for Generative AI — Issued by IBM via SkillsBuild platform

Additional Qualification

Former **Secret Security Clearance** (Held approximately 10 years; currently inactive)

Experience

92Y Unit Supply Specialist | Sergeant / NCO | United States Army | Various locations including Afghanistan 2009 - 2017

- Supervised nine soldiers across supply and logistics operations, providing daily leadership, mentorship, performance accountability, and task prioritization in Garrison and deployed environments.
- Managed and safeguarded over \$100M in U.S. Army equipment through rigorous inventory control, scheduled inspections, documentation accuracy, and formal property transfer processes.

- Supported logistics operations for four distinct units simultaneously, maintaining supply continuity across multiple command elements under demanding operational conditions.
- Deployed in direct support of operations in Afghanistan; maintained mission-critical supply accountability under austere conditions and sustained performance under pressure.
- Conducted formal property accountability investigations (FLIPLs), prepared documentation packages, gathered and organized evidence, and presented findings to command leadership.
- Processed sensitive shipments requiring special handling classifications, precise documentation, and strict chain-of-custody verification at each transfer point.
- Administered the unit Government Travel Card program for approximately 300-500 personnel, managing accounts, enforcing policy compliance, submitting reports, and maintaining fiscal controls.
- Led compliance inspections and risk assessments for high-value equipment; established corrective action plans for inventory discrepancies to maintain audit readiness.
- Trained and evaluated junior soldiers on supply procedures, equipment handling, and documentation standards, building instruction and mentorship skills transferable to IT support and operations roles.

Member Services Representative | Navy Federal Credit Union | Pensacola, FL 2021 - 2022

- Assisted 60-100+ members per shift across account services, transactions, and financial product inquiries in a high-volume, regulated credit union environment.
- Maintained precision and compliance standards across member interactions while adhering to federal credit union regulations, internal policies, and data-handling expectations.
- Resolved escalated member concerns through calm communication, documentation, and timely follow-through, reducing repeat contacts and improving member experience.
- Supported team operations during peak service periods and cross-trained across service functions to maintain flexibility and continuity.
- Documented member interactions and service actions according to recordkeeping standards, reinforcing habits directly transferable to help desk ticketing and compliance workflows.

Medical Courier Services | MidEast Delivery Solutions | Pensacola, FL 2023 - 2024

- Completed 5-8 daily route stops transporting 10-60 totes of medical specimens and supplies under strict chain-of-custody protocols and healthcare regulatory standards.
- Handled controlled substances in compliance with DEA and healthcare regulations, maintaining zero chain-of-custody violations.
- Executed STAT runs requiring time-critical coordination and real-time route adjustment under pressure, mirroring prioritization skills used in incident-response and service-desk environments.

- Maintained temperature-sensitive specimen integrity through proper handling procedures and condition monitoring.
- Ensured accurate manifest documentation and delivery confirmation on each route segment, sustaining an unbroken audit trail.

Delivery Driver | OneBlood | Pensacola, FL

2023

- Delivered time sensitive blood products to hospitals, ensuring cold chain integrity and on-time delivery
- Maintained strict chain-of-custody documentation and verified recipient sign-off at each stop.
- Operated under biohazard handling protocols and healthcare regulations.

Transportation Driver | ITL Solutions | Pensacola, FL

2022

- Transported elderly and disabled clients to medical appointments and workplaces with consistent on-time performance.
- Managed daily route logistics and coordinated multiple stops while ensuring passenger safety and comfort.
- Maintained vehicle compliance and documentation; communication proactively with dispatch to resolve scheduling changes.

Technical Projects

EVE-NG Network Simulation Labs

Built multi-device virtual topologies to practice routing protocols, VLAN segmentation, and network troubleshooting in an enterprise-style environment. Demonstrates practical networking design and hands-on configuration skills beyond certification study.

VLAN & Inter-VLAN Routing Practice

Configured inter-VLAN routing and subnetting scenarios; documented configurations and verified end-to-end connectivity using ping and traceroute. Reinforces structured documentation habits and network segmentation principles.

Wireshark Packet Analysis

Captured and analyzed live and simulated network traffic; identified protocol behavior, anomalies, and handshake sequences directly relevant to security monitoring and threat analysis workflows.

Linux (Ubuntu) System Configuration

Set up and configured Ubuntu environments; practiced file permissions, user account management, package installation, and terminal-based system administration. Builds command-line proficiency applicable to SOC and sysadmin roles.

Windows Imaging & Recovery

Performed system imaging, factory resets, and post-recovery configuration; documented each procedure for reproducibility and knowledge transfer. Directly mirrors enterprise endpoint management and help desk workflows.

OSINT Reconnaissance Exercises

Conducted open-source intelligence gathering using publicly available tools and techniques; practiced responsible scope management and thorough documentation throughout. Demonstrates security-minded thinking and awareness of attacker reconnaissance methods.

VirtualBox Virtualization Lab

Built isolated virtual machine environments for testing OS configurations, networking scenarios, and security practice without impacting host systems. Reflects disciplined lab hygiene and a safe-testing mindset essential in cybersecurity.

Echoed Chambers — Technical Workflow Project

Independent content production operation requiring multi-platform publishing workflow, file management, version control habits, audience targeting, and consistent output scheduling. Demonstrates operational discipline, technical process management, and the ability to independently sustain a structured production pipeline.

Technical Skills

Operating Systems: Windows 10/11, Linux (Lubuntu/Ubuntu, Kali), Command Line (CMD, Bash)

Security: CompTIA Security+ (Certified), OSINT Techniques, Log Review, Basic Threat Analysis

Tools and Labs: Wireshark, EVE-NG, VirtualBox, Linux Terminal, GitHub

Networking: TCP/IP, VLANs, Subnetting, Routing Protocols, Network+/A+ concepts

Endpoint Support: VirtualBox, Windows Imaging & Recovery, Device Configuration, Help Desk Workflows

Documentation & Operations: Technical documentation, audit readiness, compliance reporting, inventory control, training, mentorship, accountability

Education

GEORGE STONE – PENSACOLA, FL – CERTIFICATION IN NETWORK SUPPORT SERVICES, OCT 2026

GEORGE STONE – PENSACOLA, FL – CERTIFICATION COMPUTER SYSTEM INFO TECH, OCT 2025

PENSCOLA STATE COLLEGE – PENSACOLA, FL – ASSOCIATE IN ARTS, DEC 2021
